

Competing financial interests

In the interests of transparency and to help readers to detect potential bias, we now require authors of original research papers received on or after 1 October 2001 to declare any competing financial interests in relation to papers accepted for publication (see <http://www.nature.com/ng/info/cfi/index.html>).

Please submit one statement on behalf of all authors.

Competing financial interests are defined as those that, through their potential influence on behavior or content or from perception of such potential influences, could undermine the objectivity, integrity or perceived value of a publication. They may include any of the following:

Funding: Support for a research program (including salaries, equipment, supplies, reimbursement for attending symposia, and other expenses) by organizations that may gain or lose financially through publication of this paper.

Employment: Recent (i.e. while engaged in this research project), present or anticipated employment by any organization that may gain or lose financially through publication of this paper.

Personal financial interests: stocks or shares in companies that may gain or lose financially through publication; consultation fees or other forms of remuneration from organizations that may gain or lose financially; patents or patent applications whose value may be affected by publication.

It is difficult to specify a threshold at which a financial interest becomes significant, although we note that many US universities require faculty members to disclose interests exceeding \$10,000 or 5% equity in a company (see, for example, Lo, B. *et al.*, *N. Eng. J. Med.* **343**, 1616-1620, 2000). Any such figure is necessarily arbitrary, however, so we offer as one possible practical alternative guideline: "Any undeclared competing financial interests that could embarrass you were they to become publicly known after your work was published."

We do not consider diversified mutual funds or investment trusts to constitute a competing financial interest.

We do not require authors to state the monetary value of their financial interests.

Please print, complete and return the following form. If checking option 2, please also provide the list of competing interests in electronic form.

Declaration of competing financial interests

MANUSCRIPT TITLE: _____

MANUSCRIPT NUMBER: _____

Please check one of the following:

1. I declare that the authors have no competing interests such as those defined above or others that might be perceived to influence the results and discussion reported in this paper. ☐
2. The authors have competing interests such as those defined above or others that might be perceived to influence the results and discussion reported in this paper. ☐
3. I decline to respond to this request for information. ☐

If you have checked 2, please specify the competing interests:

In reports of original research, under a heading "Competing interests", we will publish "Authors declare competing financial interests: see Web version for details", "Authors declare they have no competing financial interests" or "Authors decline to provide information about competing financial interests."
