

# COMMUNICATIONS IN PHYSICS

ISSN 0868 - 3166

Published by  
VIETNAMESE ACADEMY OF SCIENCE AND TECHNOLOGY

## VOLUME 17, SUPPLEMENT

PROCEEDINGS OF 31<sup>TH</sup> NATIONAL CONFERENCE OF THEORETICAL PHYSICS

### Contents

	Page
1 <b>Nguyen Ba An</b> - Improved Quantum Teleportation of an Unknown Two-qubit Entangled State by a Nonmaximally Entangled Channel	1-8
2 <b>Nguyen Van Hung and Le Hai Hung</b> - Debye-Waller Factor and Correlation Effects in Atomic Vibration of fcc Crystals Containing Dopant Atom	9 - 16
3 <b>Dao Vong Duc, Phu Chi Hoa, And Doan Thi Kieu Oanh</b> - A Model of Tachyon-free D=4 Closed Superstring	17-21
4 <b>Nguyen Huyen Tung, Nguyen Viet Minh, and Huynh Anh Huy</b> - Relaxation Lifetimes of Background-doped AlGa <sub>N</sub> /Ga <sub>N</sub> Heterojunction	21-30
5 <b>Pho Thi Nguyet Hang</b> - The Reflection and Transmission Operators for the Elastic Wave from the Cholesteric Liquid Crystals Plate	31-35
6 <b>Do Ngoc Diep, Dao Vong Duc, Ha Vinh Tan, and Nguyen Ai Viet</b> - Moving Frames and Fiber Bundles over the (3+1)D Space-Time	36-47
7 <b>Nguyen Hong Quang, Ngo Trung Truc, and Yann-Michel Niquet</b> - On the Effective Mass of the Electron in Nanocrystals	47-50
8 <b>Nguyen Viet Hung, Cao Long Van, and Marek Trippenbach</b> - Stability of Two-dimensional Dispersion Managed Light Bullets in a Kerr Medium	51-58
9 <b>Truong Thi Anh Dao, Nguyen Ai Viet, Nguyen Tri Lan, Sang-Bum Lee, Juhee Yang, and Kyungwon An</b> - Using the Deformed Micro Cavity (DMC) for Studying Modes - Quantum Localization and their Formation	59-63
10 <b>Vu Van Hung, Ha Thi Hang, and Nguyen Thanh Hai</b> - Study of Impurity-diffusion in Silicon	64-70

(See cover 4)

# VOLUME 17, SUPPLEMENT

PROCEEDINGS OF 31<sup>TH</sup> NATIONAL CONFERENCE OF THEORETICAL PHYSICS

## Contents

(Continue cover 1)

	Page
11 Nguyen Khanh Thuy and Nguyen Toan Thang – Ferromagnetism of $UGe_2$ in the Dual Model for 5f - Uranium Electron	71–76
12 Nguyen Thi Lam Hoai, Nguyen Thi My An, Ngo Van Thanh, and Nguyen Ai Viet – Avanescence States in the Fundamental Gap of Semiconductor Quantum Wells	77–82
13 Vo Van On – A United Description for Dark Matter and Dark Energy	83–91
14 Nguyen Quang Bau, Dang The Hung, and Nguyen Vu Nhan – Nonlinear Response Theory of Quantum Wells Driven by a Laser Field	92–96
15 Tran Thi Thanh Van, Vo Thi Hoa, Nguyen Phu Duc, Ngo Van Thanh, and Nguyen Ai Viet – Optical Schemes for Quantum Computation in Quantum Dot Molecule with Different Dot Sizes	97– 102
16 Nguyen Thi Huyen, Tran Thi Nhan, Nguyen Phu Duc, Ngo Van Thanh, and Nguyen Ai Viet – The Effects of Band-edge Potentials in Coupled-layers Nano Systems	103–110
17 M. Trippenbach, M. Matuszewski, Dinh Xuan Khoa, Cao Long Van, E.Infeld, and B. A. Malomed – Fully Three-dimensional Breather Solitons Can Be Created Using Feshbach Resonance	111–115
18 Hoang Anh Tuan and Le Duc Anh – Optical Conductivity of Diluted Magnetic Semiconductors $A_{1-x}Mn_xB$	116–121
19 Le Dinh, Tran Cong Phong, and Nguyen Quang Bau – Transition Line Width in Rectangular Quantum Wires Due to LO Phonon Scattering	122–127
20 Nguyen Tien Quang and Bach Thanh Cong – First Principles Calculation for $BaTiO_3$	128–133
21 Tran Cong Phong, Luong Van Tung, and Huynh Vinh Phuc – Nonlinear Optical Conductivity in Doped Semiconductor Superlattices	134–140
22 Vu Van Hung, Do Cung Trang, and Le Thi Mai Thanh – Equation of States of Zirconia	141–147
23 M. Trippenbach, P. Zin, J. Chwedenczuk, A. Perez Dinh Xuan Khoa, and Cao Long Van – Analytic Model for Elastic Scattering Losses from Colliding Condensates	148–154
