TRUNG TÂM VẬT LÝ LÝ THUYẾT - VIỆN VẬT LÝ

TUYỂN TẬP BÁO CÁO

HỘI NGHỊ VẬT LÝ LÝ THUYẾT TOÀN QUỐC LẦN THỨ 27
(Cửa Lò, 02 - 06. 8. 2002)

Ban biên tập: Nguyễn Ái Việt
Nguyễn Bá Ân
Nguyễn Hồng Quang

Hà nội 2003

Mục lục

	Trang
Lý thuyết trường và vật lý hạt nhân	
<i>Squark decays into charginos and neutralinos in the MSSM with complex parameter</i> Nguyễn Chính Cường, Lê Trọng Tường, Hà Huy Bằng	1-7
<i>Clebsch-Gordan decomposition and finite-dimensional representations of the quantum superalgebra $U_q[gl(2/2)]$</i> Nguyễn Thị Lệ Diễm, Nguyễn Anh Kỳ, Nguyễn Thị Hồng Vân	8-14
<i>Accelerator-driven systems (ADS) and possibility to destroy nuclear technology waste</i> Từ Thanh Danh, Nguyễn Mộng Giao	15-23
<i>Form the nuclear rainbow to the equation of state for cold nuclear matter</i> Đào Tiến Khoa	24-29
<i>Hopf structure and representations of the two parametric quantum superalgebra $U_m[gl(2/1)]$</i> Nguyễn Anh Kỳ, Nguyễn Hồng Vân.....	30-37
<i>The $SU(3)_C \otimes SU(3)_L \otimes U(1)_N$ Models with Biquark Gauge Bosons</i> Hoàng Ngọc Long, Nguyễn Quỳnh Lan	38-44
<i>Contribution of bileptons to soft-energy of usual gauge bosons</i> Hoàng Ngọc Long, Đặng Văn Soa, Đinh Phan Khôi	45-50
<i>Single bilepton production in $e^+ \gamma$ collision</i> Hoàng Ngọc Long, Đặng Văn Soa, and Hoàng Anh Tuấn Kiệt	51-56
<i>Correlation between the radon levels and the lung cancer mortality rates - Experimental and theoretical problems</i> Trần Đại Nghiệp, Võ Thị Anh	57-61
<i>Matter stability in the Nambu-Jona-Lasinio model</i> Tran Huu Phat, Nguyen Tuan Anh, Le Viet Hoa	62-67
<i>Measurement of the cosmic Muon flux in a region of large rigidity cutoff</i> Phan Ngọc Đình, Nguyễn Tiến Dũng, Bùi Đức Hiệu, Phạm Trung Phương, Pierre Dariulat, Đặng Quang Thiệu, Võ Văn Thuận	68-73
<i>Experiment determination of the isometric ratios in photonuclear reactions $Sb^{121}(\gamma,n)Sb^{120m,g}$; $Sb^{123}(\gamma,n)Sb^{122m,g}$ and $Sr^{80}(\gamma,n)Sr^{85m,g}$ induced by 25 MeV Bremsstrahlung</i> Trần Đức Thiệp, Trương Thị An, Nguyễn Ngọc Sơn, Phan Việt Cường, Nguyễn Thế Vinh, Hoàng Thanh Ngọc	74-80
<i>Calculation of the nuclear level density in photonuclear reactions with the shell</i>	

<i>and pairing structure correction</i>	
Trần Đức Thiệp, Nguyễn Ngọc Sơn, Trương Thị An, Phan Việt Cường, Nguyễn Thế Vinh	81-88

Vật Lý Chất Rắn

<i>Landau phase transition theory for colossal magnetoresistance perovskites</i>	
Bách Thành Công, Phạm Ngọc Anh Huy, Nguyễn Hoàng Long	89-94
<i>Bottleneck effect in relaxation kinetics of cavity polaritons and its suppression</i>	
Đoàn Chí Dũng, Trần Thoại Duy Bảo	95-100
<i>Current-voltage scaling of the three - dimensional anisotropic vortex glass model with screening</i>	
Hoang Zung, Mai Suan Li, Ziep Quang Vinh	101-104
<i>The peak in the nonlinear ac resistivity of granular superconductors</i>	
Mai Suan Li, Hoang Zung, D. Dominguez	105-107
<i>Fermi-edge singularities in photoluminescence spectra of highly excited quantum-wires</i>	
Huỳnh Thanh Đức, Trần Thoại Duy Bảo	108-114
<i>Superconductivity with breathing and buckling modes of electron-phonon interaction: d-like transition temperature</i>	
Nguyễn Văn Hoa, Hoàng Anh Tuấn, Nguyễn Toàn Thắng	115-120
<i>Ab initio calculation of EXAFS including anharmonic contribution</i>	
Nguyễn Văn Hùng	121-127
<i>Correlation effects in atomic vibrations of cubic crystal in XAFS</i>	
Nguyễn Văn Hùng, Lê Hải Hưng	128-132
<i>Calculation of thermodynamic quantities of fcc and bcc metals using EAM potentials</i>	
Vũ Văn Hùng, Nguyễn Thanh Hải, Đàm Thanh Hải	133-139
<i>Influence of anharmonicity on the thermodynamic properties of semiconductors crystals</i>	
Vũ Văn Hùng, Nguyễn Quang Học, and Phạm Thị Minh Hạnh	140-146
<i>Influence of magnetic field on the amplification of sound (acoustic phonons) by absorption of laser radiations in cylindrical quantum wires with infinite potential</i>	
Nguyễn Quốc Hưng, Lương Duy Thành, Nguyễn Quang Báo	147-152
<i>Influence of electron-acoustic phonon scattering mechanism on the absorption coefficient of the weak electromagnetic wave by free electrons in quantum well</i>	
Nguyễn Việt Hưng, Nguyễn Thị Thanh Hương, Nguyễn Quang Báo	153-158

<i>Intensity of stimulated Raman scattering under quantum theory view</i> Đinh Xuân Khoa, Chu Văn Lanh, Trần Mạnh Hùng	159-164
<i>Systematic study of atomic structures of MT_xY_{1-x} ($MT=Fe, Mn, Ni, Cu$) amorphous alloys by molecular dynamic simulations</i> Đỗ Phương Liên, Pasturel Alain	165-170
<i>A continuum percolation model in an anisotropic medium: Dimensional crossover</i> Nguyễn Văn Liên, Đặng Đình Tới, Nguyễn Hoài Nam	171-182
<i>Ekimov ansatz and binding energy of exciton type II quantum dots</i> Nguyễn Ái Việt, Nguyễn Đức Long	183-187
<i>Application of the Ewald method for calculation of madelung energy of perovskite proton conductors</i> Nguyễn Hoàng Long, Phạm Ngọc Anh Huy, Bạch Thành Công	188-192
<i>Magnetic anisotropy and Curie temperature in binary alloy thin films</i> Phan Thi Le Minh, Nguyen Phu Thuy, Nguyen Ngoc Chan	193-196
<i>Transport properties in a simplified double exchange model</i> Phan Văn Nhâm, Trần Minh Tiến	197-203
<i>Roughness-induced scattering mechanisms in lattice- mismatched surface quantum well of zinc blende material</i> Đoàn Nhật Quang, Nguyễn Huyền Tụng, Vũ Ngọc Tước, Nguyễn Việt Minh.....	204-208
<i>The polarization effect in the interband absorption by excitons in 2D quantum dots</i> Nguyễn Hồng Quang, Phùng Duy Khương	209-213
<i>Theory of thermodynamic properties of substitution alloys with cubic structures</i> Phạm Đình Tám, Nguyễn Xuân Quang, Nguyễn Đức Tiến, Trần Quang Khải.....	214-220
<i>Binding energy of exciton in quantum dot with the center-cell correction depending on dot sizes</i> Tô Thị Thảo, Nguyễn Ái Việt.....	221-226
<i>Random piezoelectric field in a real strain-relaxed surface quantum well</i> Nguyễn Huyền Tụng, Vũ Ngọc Tước, Trần Doãn Huân, Đoàn Nhật Quang	227-232
<i>Reentrant charge ordering behavior in the manganites</i> Hoàng Anh Tuấn, Lê Đức Ánh, Nguyễn Toàn Thắng	233-237
<i>Coherent potential approximation for charge ordering in the extended Hubbard model</i> Hoàng Anh Tuấn and Thalmeier	238-245

On the Kondo energy of the periodic Anderson model with interacting conduction electrons
Hoàng Anh Tuấn, Nguyễn Toàn Thắng 246-252

Quang học và các vấn đề khác

Cauchy operators in the approximate solutions of tensor wave equations of optics and acoustics for anisotropic media
Barkovskii L.M, Phó Thị Nguyệt Hằng 253-258

Algorithm for generalized Deutsch's problem in quantum computing
Đào Vọng Đức, Nguyễn Ngọc Thuận 259-263

Catastrophe characters of nonlinear Fabry-Perot etalon embedding diclor-ethane
Hồ Quang Quý, Vũ Ngọc Sáu, Nguyễn Văn Hoá 264-269
